Turning Technology into Solutions

www.citizenscales.com

Precise Results Unrivalled in its Performance Class

No matter you are carrying out a simple routine task or a complicated weighing procedure, New Citizen Balances will impress you with their excellent performance, delivering accurate results within the shortest possible time, thanks to MonoTech and Perfect Self Automatic Calibration (PSAC).

The proven MonoTech weighing technology guarantees long operation life and extreme ruggedness, while PSAC automatically calibrates the balances using internal weights, whenever changes in temperature affect the accuracy of your weighing results. For added security, you can configure PSAC to initiate self-calibration at specific times.

One range many solution

A strong line up 30 models, ranging from 0.01mg to 100 kg; reliable & accurate for all lab application.

Built-in application programme other than basic weighing ease your routine lab work like,

- Counting
- Percent Weighing
- Animal Weighing
- Formulation
- Totalization
- Check weighing
- Density Determination

Easy Data Transfer

Only a single cable is required to transfer balance data to MSEXCEL or other Windows application.

No troublesome interface attachment or software installation is necessary. This unique feature makes Citizen balance extremely convenient for data analysis.

EXCELLENT READABILITY

High Contrast Backlit VFD/LCD display is exceptionally easy to read under any room lighting conditions.

THE BRILLIANT MONO-TECH

Unique & unequalled high end MONO-TECH technology (Weigh Sensor) to match the highest international standards.

ELECTROMAGNETIC COMPATIBILITY

Metal housing eliminates the effects of thunderstorms or electromagnetic interference from other equipments.

Large draft shield chamber, gives more space to the user, samples can be easily placed on the pan & also it gets accustomed to the interior temperature.

Optimal lighting conditions inside the draft shield, thanks to its nearly frameless all-glass design.

When accuracy counts

Metal Housing

The metal housing protects the weighing sensor from environmental influences which enhances the performance even with intensive use in harsh environments

The new stylish CT series, has been designed to meet high requirement for measuring precious gems, with high readability of 1milli carat.

1 mg balance with analytical draft shield is plus for reliable result as good as analytical balance.

Get more versatility & High resolution applications, in the new stylish CG series.

Unique combination of rugged and stylish design

Good Repeatability - Microbalance consists of two components. One of them contains electronic modules, and the other precise mechanical measuring system. Such a solution guarantees elimination of temperature changes influencing the weighing of the micro balance and thus it yield great repeatability of your weighing results.

Brilliant Readability -High -Contrast Graphical Display with backlit

Infrared sensors, you can weigh without touching the balance. Everything is done automatically with a wave of your hand Meet the Highest requirements:-

Glass draft shield - esthetic, cylindrical shaped motorized draft shield with small glass

Incomparably stable accuracy- Rugged and high height MONOTECH sensor allows balance to give exceptionally stable result.

Perfect Auto calibration- the balance ensures that calibration is carried out at regular intervals, and delivers consistently high accuracy.

More than weighing
5 different pre-programmed applications other than basic weighing ease your routine lab work like, Filling, Statistics, Checking weighing, Percent weighing and air buoyancy correction,

Maximum Accuracy

Diversity of moisture determination

Selection from four profiles for drying.

Result - Finish mode (manual, humidity stabilization, automatic, time defined).

Fast & Precise-Halogen dryers are increasingly used as a fast alternative to the classic oven drying method. With its Halogen infrared heat sources, this moisture analyzer can be optimally adapted to the intended application.

Brilliant Readability - Easy access to Graphical backlit LCD display.

Profile - Drying profile (standard, mild, step, rapid)

Temperature - Range of Temp. of drying max to 160°C (optional to 250°C). Set Temp. at 1°C.

A rugged design with low space requirements and easy operation are the major features of this analyzer.

High Capacity precision balances

Get extensive high resolution even when you weigh high capacity.

Design to Perform

-: Features & Application :-

GLP	ISO/GLP/GMP Compliance	Che	Checkweighing	AIR	Air buoyancy	USB	USB Port (Optional)
PCS	Piece Counting	Stat	Statistic	FIL	Filling	U	Under Weighing
%	Percent Weighing	DEN	Density Determination	UNIT	Unit Conversion	ST	Smart Track
ANI	Animal Weighing	Form	Formulation	PC RS 232	RS-232 Data Interface	PSAC	Perfect Self Automatic Calibration
	Statistical Calculation
